EDUCATION

SUNY Stony Brook University

Bachelor of Science in Computer Science

Stony Brook, NY

August 2022 – May 2024

Rochester Institute of Technology

Bachelor of Science in Computer Science, transferred

Rochester, NY

August 2020 – May 2022

EXPERIENCE

Software Engineering Intern

BNY Mellon

May 2023 – August 2023

New York, NY

- Implemented advanced data visualization techniques using Angular and an Oracle relational database, resulting in a 30% increase in user engagement with the financial portal.
- Developed Maven libraries that reduced code duplication by 40%, improving the readability and scalability of the code base.
- Revamped the web application into an Angular Progressive Web App (PWA), leading to mobile user adoption and improved accessibility across devices as well as decreased load time by 15%.

Research and Outreach Intern

ChangingThePresent

June 2022 – August 2022

New York, NY

- Researched and identified potential strategic partners for the non-profit initiative, resulting in the establishment of partnerships with 12 universities and organization
- Developed and implemented a comprehensive outreach strategy, resulting in a 25% increase in engagement with potential donors and partners.
- Contributed to a non-profit initiative aimed at channeling part of the \$450 billion spent annually on gifts towards charitable donations.

Tutor

Stem Nation

July 2018 – February 2021

Remote

- Held weekly feedback sessions with students to understand their challenges, leading to more productive tutoring sessions.
- Analyzed students' progress data to identify areas of improvement and tailored instructional strategies to address their specific needs, leading to an improvement in overall student performance.
- Collaborated with a team of tutors to develop and refine curriculum materials, resulting in a decrease in preparation time for subsequent tutoring sessions.

PROJECTS

Stack Overflow Clone | *MongoDB, Express.js, React.js, Node.js*

- Developed and deployed a fully functional clone of Stack Overflow using the MERN stack, demonstrating proficiency in full-stack development.
- Implemented user creation, login functionality, and secure password hashing to ensure a seamless and secure user experience.
- Utilized Express sessions for efficient session management, resulting in improved overall application performance.

Virtual Beverage Store | *Angular, Maven, Spring*

- Conceptualized and executed the development of an online beverage store, utilizing Angular and Spring for an enhanced customer interface, with Maven managing the project dependencies.
- Applied Agile principles throughout the development process, managing tasks efficiently via Trello.
- Ensured adherence to OOP principles while incorporating key functionalities such as custom beverages, efficient checkout, as well as integrated billing and shipping systems.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, HTML/CSS

Tools & Technologies: Git (GitHub, Gitlab), Jira, Trello, Maven, Spring, MongoDB, SQL, VS Code, IntelliJ

Languages: English, Cantonese

Transferable Skills: Time management, Problem Solving, Communication, Adaptability
